

HIDRO DUE

Hidro Duo was born over 40 years ago and has developed over time its specialization and professionalism in the restructuring and construction, plant engineering, hydraulic and electrical sectors. The strength of the company comes from the complete dedication to the customer, who always finds the availability of the staff and the solution to every problem or need. These skills brought over the years to an important word of mouth describing us as a reliable and prepared company.

The company provides all the first contact services, estimates, preliminary projects, inspections and technical advises for free. Always available on display by appointment!

A trained and available staff is ready to welcome you and will guide you according to your needs, from the small sale to the more complicated renovation. The active part of the staff is the owner who carries out inspections, welcomes you in the showroom and follows you with the works, making all the experience gathered over time available!! It is possible to showcase all the works carried out in these years of activity and therefore we list below some of our works and some of our main clients, with whom we have had the pleasure to work with and we were able to establish a relation of trust and professionalism..
